Re: Meeting Concerning Grandview Hills Elementary School

Dear Ms. Skoviera:

Thank you for meeting with members of my staff on Thursday, June 26, 2008, to discuss the current status of environmental activities at the Grandview Hills Elementary School. The EPA recognizes that Leander Independent School District (LISD) has conducted extensive sampling of various environmental media including surface soil, indoor air, and sub-slab soil vapor at the new school. In addition, EPA appreciates that LISD has excavated and removed contaminated soil, and has installed a sub-slab venting system beneath a portion of the renovated school building.

As a result of the June 26th meeting, LISD has shared with EPA its Pre-Occupancy Sampling Event document. The document proposes to collect indoor air and sub-slab soil vapor samples from multiple locations within the renovated school building. The sampling proposed in this document would satisfy the EPA.

Again, thank you for meeting with my staff and for proceeding with this cooperative approach. If you have any questions, please do not hesitate to contact me at (214) 665-3110 or Bret Kendrick at (214) 665-2240.

Sincerely yours,

A handwritten signature in cursive script that reads "Samuel Coleman, P.E. Acting".

Samuel Coleman, P.E.
Director
Superfund Division
